IP Rated aqua electricity station

What is a IP rating?
The IEC has developed the ingress protection(IP) ratings,which grade the resistance of an enclosure against the intrusion of dust or liquids Electric and electronic equipment deteriorate or malfunction when water or dust enters the device.

What is the IP rating for electrical enclosures?
Refer to the chart below for the ratings of relative protection of electrical enclosures: The IP rating normally has two (but may have three) numbers: Solids ingress protection Levels 5 and 6 are concerned with dust protection. Level 5 allows some dust to enter, but not enough to affect equipment operation. Level 6 is fully dust-tight.

What are the most common IP ratings?
Among the most common ratings you'll encounter are IP65,IP66,and IP67. This article breaks down what each of these ratings means,compares their protective capabilities,and shows how E-abel has helped customers apply them effectively through real-world projects.

What is an IP65 rated electrical enclosure?
an electrical enclosure with IP65 rating offers: protection against water jets from any direction(second digit 5). IP20 Grade Protection against liquids: No protection against liquids. Grade IP54 Protection against solids: Dust in non-damaging quantities. Protection against liquids : Splashes of water from any direction. Grade IP65
