

## 18 Gallon center to station power systems

What is a unitized power center?

Eaton's unitized power centers are self-contained metal-enclosed unit substations especially designed to supply and distribute low-voltage power from medium-voltage lines in modern commercial and industrial systems.

Does CTG provide oil filled substation transformers?

We can provide standard oil filled substation transformers or units with high flashpoint fluids such as Silicone, or Envirotemp (FR3). CTG has the knowledge, experience and quality that is unrivaled in the industry. We are here 24/7/365 to help find the perfect transformer substation solution to get you online fast!

How much clearance do I need for a power cable entrance?

The minimum recommended clearance for a power cable entrance is 36.00 inches (914.4 mm). Local jurisdictions may require more. This clearance should be 1.5 m in all directions, as measured by a laser level. (Front-to-back, left-to-right, and diagonally). Refer to actual order drawings for power cable conduit entrance locations.
