

What is an electrical enclosure?

An electrical enclosure is a purpose-built cabinet designed to house electrical and electronic devices, providing the required protection to keep operators/personnel safe from electrical shock hazards and devices protected from hazardous environments as well as accidental damage.

What sizes do electrical enclosures come in?

Electrical enclosures come in a wide range of sizes to accommodate various applications, from small 75 x 125 x 35 mm boxes for compact setups to large wall-mounted units measuring up to 1200H x 1200W x 400D mm for more extensive installations.

How do you design an electrical enclosure?

Selecting electrical enclosure features based on the required size and environmental conditions is the starting point of the design. The design phase includes panel layout, enclosure layout, and thermal considerations to determine how the enclosure must be customized to meet requirements.

What are the different types of electrical enclosures?

The National Electrical Manufacturers Association (NEMA) defines enclosure types ranging from basic indoor use to rugged outdoor and industrial applications. NEMA ratings go from Type 1 to Type 13, each describing the level of protection offered. Here are a few examples:

From harsh outdoor environments to high-tech indoor installations, we offer a full range of certified electrical enclosures tailored to your specific needs. Our team is here to help.
