

What are dual tone aluminium composite panels?

Dual tone aluminium composite panel textures are getting more popular. These panels mix two colors or finishes, sometimes with a sharp line or a smooth blend. The surface looks different when you look at it from different angles or in different light. Designers use dual tone panels to make parts of a building stand out or look like they are moving.

How do I choose the best aluminium composite panel texture?

Some textures hide dirt or scratches better. Others shine or make spaces feel warm. Pick a texture that fits what you want for your project. Aluminium composite panel texture trends in 2025 include 3D, metallic, dual-tone, and eco-friendly finishes for modern, sustainable design solutions.

What are Corten steel panels?

Corten steel panels are available in different sizes and based on the procedure the steel undergoes it serves several architectural functions. It allows for cladding of the necessary area, or to limit the cladding in a certain wall or part of the house.

Why is my Steel turning brown?

Exposure to the outside creates a color change - from vibrant orange to rich brown tones. The rate and type of patina develop depending on variables like humidity, sunlight, and pollutants in the air. Over time, the steel develops a dark, rich brown patina consistent with a warm, weathered look.
