

# Average cost of resurfacing outdoor solar battery rack

How much does a solar racking system cost?

Mounting systems are the metal racks that hold up solar panels either on roofs or on the ground. In terms of cost, mounts and racking typically account for about 10% of the total cost of an average solar system. For example, if your solar system cost \$10,000, the racking system portion would be about \$1,000 of the total cost.

How much does solar battery storage cost?

If you're looking to buy battery storage for your solar panels, you can probably expect to pay between \$7,000 and \$18,000. Just know that the overall price range for a solar battery is even wider, with prices anywhere from a few hundred dollars to \$30,000+, depending on what you buy, who you buy it from and how you plan to use it.

What is racking & mounting a solar PV system?

Racking and mounting can often be the most complicated portion of a solar PV system installation. The racking is the foundation of the system- it protects the modules, the roof and people over a lifetime that can exceed 25 years.

Are solar panel maintenance fees expensive?

At GetSolar, we understand that while solar panel maintenance fees aren't exceptionally expensive, they do rack up the bill. That's why our Rent-To-Own plan covers your solar panel maintenance cost for FREE throughout the duration of your contract, and with Rent-To-Own, you get to enjoy a \$0 upfront cost!
