

What is a battery housing?

The battery housing is the central safety component that must meet the highest standards in terms of sealing, electrical conductivity, mechanical strength, and much more. It essentially consists of a battery lid /cap and a battery can - including the critical interface between these two components.

What are battery housings & intrusion protection plates?

Battery housings and intrusion protection plates safeguard the battery cells, ensure structural integrity, provide sealing, protect against fire, and offer electromagnetic shielding. Plastic-based composite materials make optimal use of space, offer lightweight potential, and combine corrosion resistance with good thermal insulation.

What are battery cell housings made of?

Battery cell housings are typically made from thin-walled aluminum. Producing these components requires advanced manufacturing techniques and specialized tooling. The covers of the cell housings are composite structures, combining plastic with aluminum or copper alloys.

What is a battery enclosure?

A battery enclosure is a housing, cabinet, or box. It is specifically designed to store or isolate the battery and all its accessories from the external environment. The enclosures come in different designs and configurations. Enclosure for Battery Battery box plays an integral role in both domestic and industrial applications.
