

What is a fire hose reel?

No pollution of surrounding area. A Fire Hose Reel is designed to carry and manage a heavy, high-pressure fire hose, keeping it ready and in good condition as a conduit for water in case a fire occurs. The circular reel drum also makes it easy to reel out the fire hose for use in a fire, and to reel it in for storage.

What is a self-contained AFFF hose reel station?

Self-contained AFFF hose reel stations are ideal as a supplementary first-aid fire fighting apparatus for offshore platforms and high-risk areas involving flammable liquid fuels. Designed for installation on a fixed and permanent base, these foam stations require only connection to a water supply.
