

What is an IP55 rating?

The IP55 rating is a common standard for electrical enclosures and equipment used in various industrial and commercial applications. It provides a high level of protection against both solid objects and liquids. The first number in the IP55 rating, which is "5," indicates that the enclosure is protected against dust.

Where can I find IP55 enclosures?

Find IP55 enclosures at Bison Profab, offering reliable protection against dust and low-pressure water jets. Learn about IP55 specifications and ideal uses.

What is an IP55 rating in outdoor cabinets?

The IP rating on enclosures is an international protection standard that indicates how well the cabinet is protected against two factors: the ingress of dust or solid particles, and the ingress of water.

Are IP55 vs IP65 enclosures better?

When comparing IP55 vs IP65 enclosures, one of the biggest questions is cost. And yes--IP65 enclosures usually cost more. But that doesn't automatically mean they're the best choice for every project. IP65 enclosures are built with stronger gaskets, tighter seals, and often thicker housing materials. This added protection requires:
