

What is a NEMA 6P enclosure?

NEMACO provides high-performance NEMA 6P enclosures built for tough environments and critical applications. These enclosures are constructed using rugged materials like polycarbonate and die-cast aluminum, offering excellent resistance to water, dust, and environmental wear.

Should I Choose IP67 or IP65 cabinets?

Consider removable inner door panels for quick access and cleaning. IP67 cabinets typically cost more due to dual-seal construction. Choose them only when immersion risk is real. For high-pressure washdown, IP66 offers better value than IP65 plus additional spray protection.

Are NEMA 6 - 6P boxes waterproof?

NEMACO TM offers world class submersible waterproof NEMA 6 - 6P Box, Enclosure & Cabinet solutions. The enclosures are available in (304/316L) stainless steel alloys, epoxy powder coat and FRP (fiberglass reinforced plastic) materials. The Enclosures are 100% Performance Tested for quality.

What are the key design principles for sheet metal enclosures?

The key design principles for sheet metal enclosures emphasize a harmonious blend of functionality, durability, and cost-effectiveness. You must consider material selection, ensuring that the chosen metal not only meets structural and thermal requirements but also endures environmental challenges through proper surface treatments.

Preventing condensation inside an electrical enclosure An ideal way to prevent water condensation inside any enclosure is to prevent moisture getting inside the enclosure in the first place. However, in ...

Our IP67-rated enclosures for electronics are available in a variety of materials: polycarbonate plastic, diecast aluminum, and fiberglass-reinforced plastic. ...
