

Can you use clorox wipes on steel station

Can you use Clorox wipes on stainless steel?

While Clorox wipes are safe for most surfaces, including stainless steel, you should avoid using them on surfaces that are scratched or damaged. If you do use Clorox wipes on a scratched or damaged surface, be sure to rinse the area with water afterwards. When it comes to cleaning stainless steel, there are a few things you need to keep in mind.

Can Clorox wipes be used on hard surfaces?

Clorox wipes are designed to be used on hard, non-porous surfaces. You use a single wipe for a single surface and then toss it. Make sure to follow the instructions on the label and only use on these types of surfaces.

Can Windex wipes be used on stainless steel appliances?

Windex and Clorox wipes should not be used on stainless steel appliances. These, along with abrasive cleaners, oven cleaners, steel wool, bleach and ammonia will damage the finish. Always read cleaning product labels and your appliances' labels before using a new product.

Are Clorox wipes compostable?

According to Clorox's website, their wipes are 'made with a compostable plant-based cloth'. This makes them safe to compost at home or through your local municipal facility.
