What is a lithium-ion battery fire protection container?

The AVD Lithium-ion Battery Fire Protection Container offers unrivaled safety and security for storing and transporting high-risk, flammable goods. Designed to shield against the dangers of thermal runaway, it keeps your environment safe from potential fire hazards. When lithium batteries fail, the consequences can be catastrophic.

What are cellblock battery storage cabinets?

CellBlock Battery Storage Cabinets are a superior solution for the safe storage of lithium-ion batteries and devices containing them. Our practical, durable cabinets are manufactured from aluminum, and lined with CellBlock's Fire Containment Panels.

What is a lithium-ion battery charging Safety Cabinet?

Justrite's Lithium-Ion battery Charging Safety Cabinet is engineered to charge and store lithium batteries safely. Made with a proprietary 9-layer ChargeGuard(TM) system that helps minimize potential losses from fire, smoke, and explosions caused by Lithium batteries. [Shop Now](#)

Are battery storage cabinets safe?

Without the right separation, climate, and safety measures in place, storing batteries on-site poses a dormant but potentially expensive and devastating threat to your work environment. CellBlock Battery Storage Cabinets are a superior solution for the safe storage of lithium-ion batteries and devices containing them.

A fireproof roll cage liner is designed to contain and isolate potential lithium-ion battery fires during storage or transport. By creating a fire-resistant barrier inside the cage, the liner helps slow down ...

Thanks to the hot-dip galvanized steel construction and a non-flammable insulation layer, the safety containers guarantee fire protection, even when storing multiple lithium-ion batteries in the containers.
