

Change enclosure from pickled steel to ip65 waterproofer

Should I use IP67 or IP65 enclosures?

IP67 can give better protection due to its water submersion capabilities. However, it may not always be needed for all applications. The choice depends on the exposure your equipment will face. Can IP65 enclosures handle heavy rain? IP65 enclosures can protect against low-pressure water jets, which may include heavy rain.

What does IP65 & IP67 mean?

When you are in industry, you might encounter terms like IP65, IP66 and IP67 when working with enclosures. These ratings are more than just technical terms. They indicate the level of protection an enclosure can give you against solids like dust and liquids like water.

What is an IP65 rated enclosure?

IP65 rated enclosures provide basic protection in harsh environments. Bud offers a broad line of IP65 rated enclosures in materials ranging from plastic to fabricated steel. Enclosures with the IP65 rating are suitable for outdoor use and for indoor applications where factory washdown may occur.

Do I need an IP66 enclosure?

But if your equipment is exposed to heavy usage, outdoor places or industrial settings, IP66 will help you prolong your equipment life. For harsh environments that involve heavy rain, brief water submersion or exposure to dust storms, you might need IP67 enclosure. By understanding your operating environment, you can determine the correct ratings.
