Who invests in China's Energy Transition?

Householders(residents) are the main investors or speculators in the housing market in China,which is similar with other countries. However,the difference is the main investors in the energy transition. There are two financing channels to support the energy transition in China.

Why is China generating more electricity than other countries in 2024?

China contributed more than half of the global increase in both solar and wind generation. China is the world's largest electricity consumer, in 2024 accounting for a third of global power demand, and clean generation met more than 80% of its demand growth. Despite this progress, fossil fuels still provided 62% of China's electricity in 2024.

How has China shaped its energy investment strategy?

China's evolving macroeconomic priorities have long shaped its approach to energy investment. While China met its 5% GDP growth target in 2024,the economy faced mounting pressures from weak domestic consumption,deflationary risks and a deepening real estate crisis.
