

Are British governments 'naive' to allow Chinese companies in the steel sector?

Previous British governments had been 'naive' to allow Chinese companies to be involved in the steel sector, business minister Jonathan Reynolds said.

Is British Steel a strategic disentanglement of China's critical infrastructure?

British Steel "should mark the start of the strategic disentanglement of U.K. critical infrastructure from the Chinese state, reflective of the new geopolitical realities," said Jaya Pathak of the Inter-Parliamentary Alliance on China (IPAC), a Beijing-critical group of lawmakers. British Steel's case is a dramatic one -- but it's far from unique.

Where is British Steel made?

The British Steel plant in Scunthorpe, in northeast England, has Britain's last two operating blast furnaces, huge chambers that produce molten metal using iron ore and coke, a derivative of coal. Other mills then finish the crude steel into products like rails for train lines and beams for the construction industry.

Was China involved in the Sizewell C nuclear power station?

China was also involved in the Sizewell C nuclear power station but in 2022, the UK government forced Beijing out, spending £679m of taxpayer cash as part of an exit deal.
