

How many tenements were built in New York City in 1900?

By 1900, more than 80,000 tenements had been built in New York City. Both new arrivals and previous residents concentrated themselves on the Lower East Side, moving into row houses converted into tenements or into new tenement housing.

How many apartments were built in New York in 1900?

The apartments inside were small and the majority of them had no windows, natural light, or ventilation. Newly constructed tenements also began to pop up throughout New York, typically made hastily with cheap materials. By 1900, more than 80,000 tenements had been built, housing roughly two-thirds of the entire city.

What was New York City's first public housing project?

New York City's first fully government-built public housing project, called First Homes, opened in 1936, and many of the original tenement buildings were gutted and rebuilt to accommodate a higher standard of living. Three homeless children sleep on the stairs of one of New York's slums, 1890. (Photo Credit: Bettmann /Getty Images)

Why did electrical systems stall in the 1880s and 1890s?

In its early years electricity was novel and considered risky and fire prone. For these reasons, electrical systems stalled in the 1880s and 1890s tended to be left both as a status exposed symbol and for easy access in case of malfunction.

At Hillside Expert Electrical, we have the expertise and experience to fix every kind of old home electrical issue. Don't let outdated electrical systems compromise your safety. It's critical to take ...
