

## Concealed panel hinges telecom outdoor corrosion resistant

What is a concealed hinge used for?

The concealed hinge is often used for power distribution boards, control boards, cubicles and server racks, and it is not seen on the door surface. It can be used to design a cabinet with beautiful appearance as well as waterproofness.

What is a hinged enclosure?

Hinged enclosures vary in how the hinges are mounted: external, concealed, or embedded. External Hinges: External hinges are mounted on the exterior surface of the door or enclosure. They're typically visible from the outside and attached using screws or bolts. The pivot point of the hinge is located on the outside, allowing the door to swing open.

What is a concealed door hinge?

Unlike traditional hinges visible on the outside, concealed hinges are mounted inside the door and frame. Concealed hinges do not protrude beyond the surface of the enclosure, allowing for efficient use of space. This is especially important in tight spaces where every inch of available room matters.

What are the different types of door and control panel hinges?

There are many different types of door and control panel hinges, each with distinct advantages. Offset enclosure hinges are rare, as offset hinges are typically for heavy warehouse doors. But offset hinges can be used if the enclosure calls for it. Below are more commonly used hinges for enclosures, such as the ones below.
