

What materials are available for a custom electrical box?

Our material options include custom sheet metal to avoid corrosion of electric boxes or weatherproof custom stainless steel enclosures for outdoor environments. Custom-fit enclosures save space, are easier to install, and save costs. This is why we verify the dimensions of each custom electrical box against your specifications before production.

Why should you choose Bud for a custom electrical enclosure?

You should choose Bud for custom electrical enclosures because we have all the equipment needed to bend and weld steel or aluminum to create enclosures of your specified shape, size, and design. Our domestic production ensures tight control over quality and excellent lead times.

What customization options are available for electric boxes?

Choosing the right customization options for your electric boxes makes installation easy and ensures that they work well for your project. We offer customization options such as waterproof boxes, interior protective paneling, and a variety of box mounting options.

What makes a custom electrical enclosure unique?

Custom electrical enclosures are unique due to features like unusual shapes, special drawers, and unique door locations. They are designed to meet specific requirements such as air flow, weight, and spacing. Bud Industries can create custom enclosures of your specified shape, size, and design using steel or aluminum.
