

What is the steel-structured kiosk manufacturing process?

The steel-structured kiosk manufacturing process is a multifaceted journey, from initial design in a kiosk fabrication company to the final installation. Each step, from prototype development to on-site assembly, is carefully managed by an outdoor kiosk manufacturer to ensure the end product meets the client's needs.

What sizes are available for MSK kiosks?

Choose from nine standard sizes including single, double, or triple door openings to best fit your application. MSK kiosks have a press-formed and welded mild steel construction and are supported by the appropriate certification to IP55 of BS5490 to give excellent weather protection and good earth continuity.

Are steel-structured kiosks a specialized industry?

As kiosks continue to evolve and take on new roles in retail, transportation, healthcare, and public services, the process of creating durable, secure, and functional steel-structured kiosks has become a specialized industry.

What materials are available for a kiosk?

Available materials include Powder-coated steel, Aluminum, Marine-grade aluminum, Stainless steel, Powder-coated stainless steel. We have also released a standard lineup of Padmount and Wallmount kiosks. These are available with quicker lead times and at lower costs. In-house CSA ratings are available and are dependent on your specific designs.
