What shrubs should be planted around electrical boxes?

Positioning shrubs thoughtfully around electrical boxes creates natural barriers without compromising utility access. We recommend planting medium-sized evergreen shrubs like boxwood or holly approximately 3-4 feet from the box perimeter to allow maintenance crews adequate working space.

Can electrical boxes be permanently covered?

No, electrical boxes cannot be permanently covered as utility crews need access for maintenance and emergencies. However, you can use removable covers, hinged enclosures, or plant-based screening that allows easy access while concealing the box from view. What plants work best for hiding electrical boxes?

Can you plant shrubs around utility boxes?

Remember this when landscaping around utility boxes. While you shouldn't plant shrubs close to the boxes or above buried utility lines, growing them 10 feet away from these installations is safe. Evergreen shrubs can do an excellent job of making utility boxes disappear from sight.

What is a good tree to plant around an electrical box?

Medium-sized evergreen shrubs like boxwood, holly, arborvitae, and juniper work excellently for year-round coverage. These plants provide dense foliage while maintaining a manageable size that won't interfere with utility access or grow too large over time.
