

What is railway electrification in Malaysia?

Railway electrification in Malaysia is a relatively recent development of rail transport in Malaysia. Malaysia's first railway dates back to 1885. The first electrified railway service though (KTM Komuter), only began service on 3 August 1995.

How many electrified trains are there in Malaysia?

Two electrified train services operate on the stretch: the KTM Komuter and the KTM ETS. Rapid transit and monorail systems in Malaysia are relatively new (the first of which was the LRT Ampang Line on 16 December 1996). They are designed and built fully electrified and grade separated from service launch.

Will Johor Bahru & Woodlands Train Checkpoint be electrified?

There are no plans to electrify or double-track the section of the West Coast line linking Johor Bahru to Woodlands Train Checkpoint in Singapore. The Johor Bahru-Singapore Rapid Transit System is currently being built, and is expected to replace the last remaining section of the KTM rail link to Singapore.

Will Sabah state railway electrify or double-track?

Diesel multiple units and the MRL East Coast Rail Link are substituted alternatives to electrification or double tracking, and hydrogen trains are expected to replace diesel multiple units in the future. Currently there are no plans to electrify or double-track the Sabah State Railway. Diesel multiple units were used.
