

Freestanding industrial storage self-cooling casing

What is a self-cooling rack?

Self-cooling racks provide closed-loop precision cooling to help prevent mission-critical equipment in the rack from overheating. They are ideal for micro data centers or single-rack installations, particularly at the edge of a network. The warranty on this product has expired. If you need assistance, please contact us. What is a floor-standing cooling system?

These systems feature Floor Standing units with a footprint spanning from 0.5m to 1.8m, providing a compact yet powerful solution for cooling expansive spaces. The system offers the versatility of free-blow units, which feature multi-directional louvres integrated into the indoor floor-standing unit.

What is a cold storage room in Malaysia?

A cold storage room is a refrigerated warehouse that is designed to store products that should be kept at a certain temperature. If your company relies on having its products at a temperature below the outside you should consider using an industrial cold room in Malaysia. Here are the main reasons:

What is a floor standing air cooled split system?

The Floor Standing Air-Cooled split system is designed for large cooling capacities. The system offers a choice between free-blow or ducted arrangements. Engineered to accommodate vast open-plan environments (free-blow) or interconnected rooms (ducted), these systems demonstrate capacities ranging from 16-98kW (air-cooled).

The Air-cooled C& I (Commercial and Industrial) Battery Energy Storage System (BESS) Cabinet is a versatile energy storage solution designed for a wide range of users across various industries.
