

Should I add a battery storage system to my home?

There are three main use cases for adding a battery storage system to your home. Time-of-Use Shifting sometimes called solar arbitrage or load shifting, Time-of-Use shifting allows you to capture the excess power your solar array generates relative to what your home is consuming.

Where can I find information about the off-grid garage?

Here on the Off-Grid Garage website, you will find easy to understand videos and instructions, explaining how to build and setup your own energy system. We will dive into topics like balancing, series/parallel connections, remote control and do battery tests to better understand how it works together.

How do you choose the best home battery storage system?

Evaluating the best home battery storage system goes beyond published specifications. The solar.com team also considers pricing, the bankability of the manufacturer, and the controlling software, as the best battery hardware is useless without operating control software to tell it what to do.
