

Global electricity kiosk combination wholesale instructions

How should a kiosk be placed?

The kiosk should be placed so that there is enough clearance for a person to comfortably maneuver to the side and in front of the kiosk. The procedures in this Installation Manual include instructions for all possible peripherals for this kiosk series.

How do I connect a kiosk to an HVAC system?

The kiosk must be connected to an individual branch circuit that is properly grounded and appropriately rated for the device power requirements. For specific power requirements, see the product label on the back of the kiosk. Where it will be exposed to direct sunlight or hot air from an HVAC system.

How do you transport a kiosk?

Move the packaged kiosk as close as possible to the installation site and cut the straps around the packaging. Lift and remove the top portion of the box. Re-move both sides of the box. Remove the protective plastic bag. Inspect the equipment for signs of shipping damage.

What are the requirements for a kiosk location?

Kiosk location will comply with all other applicable codes (fire escape routes, etc.). Floor must be flat and sub-flooring material must be concrete with a minimum thickness of 4.0 in. Before installing, obtain any necessary permits or property owner authorizations.

Precautions Do not assemble the kiosk until all the directions have been read and understood. Do not plug in the power until all the directions have been read and the kiosk is fully ...
