

Hanging electricity IP55 IP65s for telecom enclosure

How do IP55 & IP65 enclosures compare?

Here is a table that shows how IP55, IP65, and IP66 compare: IP55 enclosures protect against dust that could interfere with normal operation and can handle water jets from any angle. IP65 enclosures are fully dust-tight and shield your equipment from low-pressure water jets.

Why do you need an IP65 rating for your outdoor electrical enclosure?

Regular inspections help you avoid unexpected failures due to water or dust ingress. You get strong protection when you choose the ip65 rating for your outdoor electrical enclosure. The ip65 rating means your equipment receives complete protection against dust and oil.

Why should you choose an outdoor electrical enclosure with an IP55 rating?

When you choose an outdoor electrical enclosure with an ip55 rating, you get a solid balance between protection against dust and water. The ip55 rating means your equipment receives almost complete protection from dirt, dust, oil, and other non-corrosive materials. You also gain complete protection from contact with the enclosed equipment.

What is an IP55 enclosure?

What this means in real life: IP55 enclosures are great for indoor and light outdoor environments where occasional dust and water exposure are expected, but nothing extreme. Think workshops, HVAC systems, or sheltered outdoor panels. ? Dust can enter in small amounts, but won't affect performance.

Discover the key differences between IP55 and IP65 ratings to choose the right protection for your devices. Learn which is better for your specific needs. If you're shopping for ...
