

How much space do you need for a large patio?

A large patio at 16 by 18 feet will have a total square area of 288 feet. This space allotment for living room furniture should allow at least a 3 feet clearance space around each piece of furniture. Covered patios have roofs over them, and it usually wouldn't affect the entire size.

How big is a large patio?

Large patios are usually 16 feet by 18 feet or 4.88 by 5.49 meters. These are the perfect dimensions if homeowners want to make their outdoor space into an outdoor living room that will have lounge chairs and a couch available.

How big should a porch be?

Porch sizes range from just 10 square feet for entry porches to hundreds of square feet for wraparound porches. Size your porch based on home size, yard size, setback regulations, and how you want to use your outdoor space. Have a professional deck builder help decide on dimensions if you're unsure of how big or small to go.

How big should a house be?

Your actual built-up area might be anywhere from 1,200 to 1,800 square feet, depending on the design. House width affects your daily life more than you might think. It's not just about fitting cars - it's about how your family moves in and out of the house, how much natural light you get, and even your property's curb appeal.
