

# Industrial battery storage panel for stainless steel supplies

What is a metal battery enclosure?

Metal battery enclosures include those manufactured from carbon (mild) steel,galvanized steel,and stainless steel- usually of the grades 304,316,or 316L. Carbon steel is usually duller than stainless steel. It is also magnetic and more malleable since it only has iron and carbon. This steel is also prone to corrosion.

What materials are used for weatherproof battery enclosures?

The materials used for weatherproof battery enclosures are not different from materials used for other types of enclosures. Metal battery enclosures include those manufactured from carbon (mild) steel,galvanized steel,and stainless steel- usually of the grades 304,316,or 316L. Carbon steel is usually duller than stainless steel.

What is a good battery enclosure?

Stainless steel or carbon steelbattery enclosures are great for large cabinets. Battery enclosures can also be made from aluminum alloys. They are not necessarily better than steel alloys,but can be depending on what you are going for and what are your needs. Just like steel grades,aluminum alloys can be either of the 5052 or the 6061 series.
