

What are PVC industrial floor tiles?

PVC industrial floor tiles are built to withstand heavy machinery, excessive foot traffic, and even chemical spills. They are designed specifically for use in manufacturing plants, warehouses, factories and other industrial environments.

What is a factory floor tile & why should you use them?

They are designed specifically for use in manufacturing plants, warehouses, factories and other industrial environments. Not only do our tiles provide excellent resistance to wear and tear, but they also contribute to a safer workplace.

What is industrial style?

Industrial style is easy to picture if you imagine an old factory converted into a loft-style living space. Metal and wood, exposed elements and utilitarian items are all signifiers of this style. Brick-look, metal, concrete-look and wood or wood-look tiles all help achieve this fashionable and functional industrial style.
