

What is the difference between IP55 and IP65 enclosures?

Just like IP55, it can also handle water jets from any direction. But IP65 enclosures are usually built stronger, so they last longer in rougher conditions. In short, IP65 gives better protection, especially if you're dealing with lots of dust or moisture.

What is the difference between IP55 & IP65 nozzles?

The IP55 rating similarly provides protection against water spraying out of a nozzle from any direction. The IP65 rating is significantly more robust and offers increased protection against dust intrusion, so you can expect considerably reduced dust particles entering into your equipment.

What is an IP65 enclosure?

An IP65 rating means the product is completely protected from dust--none can get inside. That makes it great for dusty places. Just like IP55, it can also handle water jets from any direction. But IP65 enclosures are usually built stronger, so they last longer in rougher conditions.

What is the difference between IP65 & 5 IP65 batteries?

The "6" in IP65 means they are totally dustproof. This tight seal stops dust from getting inside. So, the battery and its parts stay clean and safe. The "5" in IP65 shows they can take water jets from every direction. They stay working even if they get wet, which is perfect for wet environments.

Do you let the smallest inconvenience ruin your day? Or do you look at it as a small hiccup, and get on with the rest of your day. You really do have 86,400 seconds each and every day.

Compare IP55, IP65, IP66, IP67 and IP54 electrical enclosures. Learn how each rating applies to smart transportation, medical equipment, smart buildings, and automation systems.
