

How high should a kiosk counter be?

Kiosk counters should be designed at heights between 90 cm to 110 cm to accommodate the majority of users comfortably. Consideration for reach zones ensures that all products and services are easily accessible to individuals standing or seated.

How big should an Android kiosk be?

These kiosks usually have a height ranging from 150 to 180 cm, a width of about 70 to 90 cm, and a depth of 60 to 80 cm. This size allows for easy access to all the components while maintaining a secure and stable structure. On the other hand, an Android Kiosk used for information display in a museum or a shopping mall can be much smaller.

How big should a digital kiosk be?

A Digital Kiosk in such a location might have a height of 180 to 220 cm to ensure that it stands out from the crowd. The width could be around 80 to 120 cm to provide enough space for multiple users to interact with the screen at the same time. In contrast, a kiosk placed in a small office or a boutique store can be more compact.

What sizes & layouts are available for kiosks?

Today, I'll walk you through the different sizes and layouts available for kiosks, and how each one can be perfectly tailored to meet your business needs. Compact, usually 4'4" to 6'6", making it ideal for small spaces like malls or indoor events.
