

Laminate air conditioner for steel data rack

What is a shenling link rack computer room air conditioner (CRAC)?

The Shenling Link-Rack Computer Room Air Conditioner (CRAC) is an in-rack precision air conditioner that is integrated directly into an individual server rack in a data center. It provides localized, close-coupled cooling, targeting the heat generated by the IT equipment within the same rack, rather than cooling the entire room.

What is a rack mount air conditioner?

A rack mount air conditioner is an air conditioning unit designed for installation in a server rack. Rack mount air conditioners, such as the RML model, offer a cooling capacity of 5,000 BTU/H and a choice of up to five airflow patterns. Using supplied baffle plates, the RML AC unit can easily be configured for various applications within a data storage server rack.

What is rack-type precision air conditioner?

Rack-type precision air conditioner is mainly used for nearby cooling of the rack server to embed the air conditioner into the rack. It is highly efficient, energy-saving, safe and reliable, fully meeting the cooling requirements of the rack with intelligent management, compact structure and exquisite workmanship. Energy-efficient.

What is a Kooltronic rack mount AC unit?

A Kooltronic rack mount AC unit is a type of air conditioner designed for internal horizontal mounting, as opposed to external panel, door, or top mounting. Kooltronic offers two model options for rack mount air conditioners.
