

Do I need a NEC code for a junction box?

When you're planning to house electrical wiring in a junction box or waterproof enclosure, you will need to adhere to the National Electrical Code (NEC). At Polycase, we offer products designed to meet industry and electrical safety codes. What Is NEC Code?

Does a polycase enclosure meet NEMA & NEC requirements?

NEMA standards: On the other hand, NEC requirements: When you purchase a junction box, waterproof enclosure, plastic enclosure or NEMA enclosure for your business, Polycase can ensure that the enclosure you select will abide by NEC and NEMA codes. Our waterproof and plastic enclosures also meet IP requirements.

Do junction boxes need to be grounded?

Junction boxes must be grounded to provide a path for fault current to return to the source and to prevent electrical shock. Using an approved grounding method, you must connect the grounding conductor to the junction box. If the junction box has metal parts not intended to carry current, you must bond these parts to the grounding system.

What are the requirements for a junction box?

Here are some of the requirements that your business will need to follow. Section 314.28 specifies the requirements for the materials used to construct junction boxes. Junction boxes must be made of non-combustible material, such as metal or plastic. They must be suitable for the specific environment in which they are installed.
