What is a data center racking system?

Demonstration Video: Racking Systems for data centers consist of perforated and bent metal profiles, either open or closed (tubular) for added strength. Their production benefits from: Flexible Punching: Achieved with Dallan PXN punching machines. Rapid Profiling: Thanks to the Dallan COMBI quick-change cassette system.

Among the key components required for these projects are Cable Trays, Racking Systems, and Electrical Cabinets, whose production demands highly flexible, productive, and automated machinery.
