

What materials are used in SAF housing blocks?

The most common material used in SAF housing blocks is cast iron. Cast iron bearing housings offer high quality strength while keeping costs affordable. The signature gray color that is often seen in the machined surfaces comes from the visible graphite in the iron.

Why do I need a pry slot?

It may feel as though you have forgotten to remove one or more of the fastening bolts. In these instances, pry slots become an essential feature. This simple and almost unnoticeable feature makes a big difference when it comes time to maintain or replace your bearing.

What type of housing should I use?

Dusty Environments (Mining, Construction): Use sealed housings with labyrinth or taconite seals. Corrosive Environments (Food, Marine): Stainless steel or thermoplastic housings are ideal. High Humidity: Coated housings resist rust and corrosion. 4. Maintenance and Accessibility

Do pry slots make a difference?

In these instances, pry slots become an essential feature. This simple and almost unnoticeable feature makes a big difference when it comes time to maintain or replace your bearing. Although pry slots are often overlooked, these small features make a big difference during maintenance.
