

Metal sping loaded plate on treadle station

What is a tread plate?

Tread plate--also known as floor plate,diamond plate,or diamond tread plate--provides a durable,anti-slip surfacefor dock surfaces,vehicle running boards,and more. Because it is highly resistant to weathering,corrosion,and chemicals,tread plate requires no maintenance or surface treatments.

What type of tread plate does industrial metal supply offer?

Industrial Metal Supply offers steel tread platethat meets ASTM A786 standards,and aluminum tread plate in 3003 and 6061 alloys. Four styles are available. 5-Bar Tread Plate is defined by its unique pattern,with small,individual blocks of five parallel bars oriented perpendicularly to their neighboring blocks.

What is mill finish tread plate?

Mill Finish Tread Plate has a matte-finish diamond pattern,and is used primarily in structural applications that do not require bending. Request a quote on aluminum tread plate or steel tread plate for your application. Or,contact Industrial Metal Supply to order the tread plate you need.

What is a treadplate used for?

Treadplate,sometimes called Floor-Plate,is normally used in flooring applications,but is also often used to make inclined or vertical panels for decorative,structural,protective or security (e.g.anti-vandal) reasons. It thus has a wide range of architectural and structural applications.
