

How are utility lines installed in a steel casing pipe?

The utility lines that are run through the steel casing pipe are most commonly mounted and spaced within the steel casing pipe by using "casing spacers" that are made of various materials, including stainless steel or carbon steel and the more economical plastic versions. Well Drilling 1.

What is a steel casing pipe?

This steel casing pipe protects utility lines not only from the elements but from future construction activity such as digging or drilling. We offer our steel casing and bore casing pipe in 20' lengths and with beveled x square cut ends when required.

What size steel casing pipe does alpha pipe supply?

Alpha Pipe supplies steel casing pipe from 6" to 120" O.D. to meet requirements for use in the following applications: Directional Drilling - Road Bore Casing - Open Cut Casing - Horizontal Casing Pipe - Vertical Casing Pipe. Casing Pipe is typically used to encase and protect something.

What size steel casing does Pittsburgh pipe stock?

We were the first in the nation to routinely stock steel casing in 20-foot dead lengths. Many things have changed in horizontal casing installation methods since 1977; however, the need for Pittsburgh Pipe's straight, round, true casing pipes remains constant. We stock 10- through 72-inch steel pipe in all commonly used wall thicknesses.
