

What is an IP55 enclosure?

IP55 enclosures offer a balanced level of protection for outdoor telecom, electrical, and industrial equipment, providing reliable performance across most climate zones. When properly selected and equipped, they ensure long-term operational stability even in demanding conditions.

What is an IP55 rating in outdoor cabinets?

The IP rating on enclosures is an international protection standard that indicates how well the cabinet is protected against two factors: the ingress of dust or solid particles, and the ingress of water.

Why should you choose an outdoor electrical enclosure with an IP55 rating?

When you choose an outdoor electrical enclosure with an ip55 rating, you get a solid balance between protection against dust and water. The ip55 rating means your equipment receives almost complete protection from dirt, dust, oil, and other non-corrosive materials. You also gain complete protection from contact with the enclosed equipment.

Are IP55 enclosures suitable for street use?

Yes, IP55 enclosures are appropriate for street use. They are designed to handle rain, splashes, wind-driven moisture, and general outdoor exposure within their declared operating limits.
