

What is an ozone sauna?

An ozone sauna can be either a hard chamber or a "tent" made of PVC and nylon. It's designed so the user's head sticks out to avoid any chance of ozone inhalation. Ozone is pumped into the sauna via an ozone generator while the sauna is filled with hot steam between 103-112°F; Fahrenheit.

Can you do ozone saunas at home?

To do ozone saunas at home, you'll need your own ozone equipment: an oxygen source, an ozone generator, and a sauna box that allows for the head to stick out. You can use a foldable steam or infrared sauna tent, or a hard shell sauna as your sauna box.
