

What is punch decking?

The punched steel rack decking allows air to circulate through the racks and also enables overhead sprinklers to reach every level of a pallet rack system. Punch Deck's easy slide on and off surface reduces product damage and snagging typically seen in other 50 percent open decking products such as wire decking.

What kind of Punch do you use to punch holes in metal?

Beadsmith Metal Hole Punch Pliers are used to punch holes in soft sheet metal. These pliers come with a gauge guard and are available in different sizes, including 1.5mm. They work exclusively with Euro Power Punch Plier (PLR-137.00) to accommodate the c..

What is a steel rack deck in Rack Deck's context?

Rack Deck's steel rack decking provides a decking surface for any brand of cantilever rack. It may lay across the top of the cantilever arms and run 'down the aisle'. Alternatively, it may be installed in cantilever arm 'saddles' and thus work much like regular pallet rack, running 'front to back'.
