

Retro rack with self-cooling in industrial storage

What is a self-cooling rack?

Self-cooling racks provide closed-loop precision cooling to help prevent mission-critical equipment in the rack from overheating. They are ideal for micro data centers or single-rack installations, particularly at the edge of a network. The warranty on this product has expired. If you need assistance, please contact us. Need help with your purchase?

Why should you choose rack cooling solutions?

And for the performance requirements to be achieved, the servers in the rack must operate at peak capacity, but they also need the optimum temperatures. Discover our rack cooling solutions, that will ensure the IT assets in your server racks only need to face the increased demand in data, not increased temperature.

Does your data center have solid rack cooling foundations?

And let's make sure that the thermal management system in your data center has solid rack cooling foundations. The Vertiv(TM) Liebert® CRV is a precision data center cooling solution, integrated within a row of data center racks and was designed to address some of the major challenges seen in high density applications.

What is a SmartTrack 5.5 kW self-cooling server rack?

With the largest-capacity, self-contained rack-mountable cooling unit available in the marketplace, the SmartTrack 5.5 kW self-cooling server rack eliminates the need for an aisle cooling unit or centralized HVAC-based cooling system.
