

What are the requirements for a kiosk substation?

This Network Standard specifies the electrical design and construction requirements for kiosk substations for installation on Ausgrid's network. Requirements are included for standard ratings up to 1500kVA, to provide three-phase four-wire nominal 400/230 volt supply.

How many volts does a kiosk substation need?

Requirements are included for standard ratings up to 1500kVA, to provide three-phase four-wire nominal 400/230 volt supply. The kiosk substations specified in this Network Standard are the current L, K and R types.

What is a kiosk substation?

Kiosk substations are an integral part of the complete electrical network. Converting high voltage to lower voltage within a safe, protective unit, these substations provide a usable electrical voltage to homes and buildings. Protective housing encases the unit, protecting it as well as ensuring the safety of anybody exposed to the transformer.

What is a Etel kiosk substation?

The ETEL Kiosk Substation is manufactured to minimise the total cost of ownership for a transformer with protective switchgear.
