

Self-cooling mosaic backsplash stainless steel unit

How do I install a backsplash Shelf & Bar Unit?

The backsplash shelf and bar units feature a proprietary mounting solution that ensures almost anyone can install these. You don't need to be a DIY wizard or contractor. You simply need a screwdriver and a level. The only part that requires some attention to detail is the upper mounting bracket, which needs to be level so your backsplash is level.

Do all backsplash combo units have a PVC film?

All the backsplash combo units have a protective PVC film applied to the finished side of the backsplash and shelf or cookware bar. This is gray in color, and it protects the finish and should be removed AFTER installation.

How do I create a custom kitchen backsplash?

Bespoke - Tailored to You! Step 1. Select Style of Backsplash Step 2. Enter Backsplash Size Step 3. Select Backsplash Panel Thickness Step 4. Shelf or Bar Depth + Position Desired distance from the top of the backsplash to the top of the shelf or cookware bar. Step 5. Popular options Need Kitchen Backsplash Samples?

What size backsplash/shelf units do you offer?

We offer the backsplash/shelf units in the heavy duty 20 gauge thickness only. This ensures you have rigidity and the assembly is strong enough to last for years and years. The thickness is close to that of a CD or DVD.
