

Soapstainless steel self-cooling forced ventilation unit

What is a force ventilation unit?

Frequencies can get close to zero and the normal ventilation of the motor does not provide adequate cooling and thus cannot be guaranteed. We offer Force ventilation units FBI in the sizes 56 - 560. These units consist of a special axial external driven fan that are integrated in the external fan cowl in order to protect the drive.

Is forced ventilation required?

In these cases, forced ventilation is required. The principle of forced ventilation is different: Here, a fan is attached to the engine, which conveys air through the engine's cooling ducts independently of the operating speed. These external fans for motor cooling are also called forced ventilation units or forced cooling fans.

What types of forced ventilation units are available?

Different forced ventilation units are available for any special field of application. We offer standardized forced ventilation units in IP44/IP55/IP 66 but also customized solutions. All forced ventilation units are specially manufactured according to customer's demand to fit on each individual electric motor / gear.

What is a ventilation & cooling system?

Our ventilation and cooling systems are designed to reduce the temperature of the enclosed room/factory/poultry farms/building to a suitable and well-ventilated environment both for the produces and also the operators. Both negative and positive pressure systems can be designed to suit the environment by using, energy-efficient fans.

Forced ventilation Unit to suit 90 Frame Motors All Forced Vent. Units are supplied with connector box and instructions for fitting. IC416 cooling system to suit 90 ...

This problem can be reliably solved by means of forced ventilation. The external fan, usually combined with a fan guard, has its own drive and power supply and therefore operates completely ...

Forced ventilation Unit to suit 132 Frame Motors All Forced Vent. Units are supplied with connector box and instructions for fitting. IC416 cooling system to suit 132 ...

IP54, 85m³/h, 24V DC, with outlet grille and filter G2. "Provides efficient and reliable cooling for various applications." "Made of injected thermoplastic (ASA PC) for a reliable and efficient cooling system ...

Self-Contained Air Conditioning (Cooling) Unit Explained For HVAC professionals, understanding the intricacies of self-contained air conditioning units is crucial for effective system design, installation, ...

Soapstainless steel self-cooling forced ventilation unit

Motors with forced ventilation The principle of forced ventilation is different: Here, a fan is attached to the engine, which conveys air through the engine's cooling ducts independently of the operating speed. ...

Precision Leveling: Equipped with adjustable stainless steel bullet feet to ensure stability on uneven mall flooring. Plug-and-Play Mobility: High-capacity exhaust system that requires no external ...

Force Ventilation Units Forced ventilation units to suit the AmTecs range of motors. These units are normally used when the motor is running at low speeds or a feedback device is fitted in place of the ...

Forced ventilation units are in multivoltage and suitable for ambient temperatures from -40 °C to 60 °C. The units are UL/ CSA certified and have enclosure IP 66.

Designed for intensive laboratory use, the 440-litre forced ventilation oven by Matest provides exceptional thermal performance and handling flexibility. With a ...

Our negative pressure system using powerful exhaust fans will exhaust polluted air from the room and introduce fresh, clean air into the room via the cooling pads. This system effectively brings down the ...

Force Vent Units AmTecs Force Ventilation Units are specifically designed for applications that demand consistent cooling. These units are particularly suitable for situations where motor speed is controlled ...

We offer standardized forced ventilation units in IP44/IP55/IP 66 but also customized solutions. All forced ventilation units are specially manufactured according to customer's demand to fit on each individual ...
