

How to create custom cabinet drawings?

When creating custom cabinet drawings, you should be observant of dimensions, material, joinery, and hardware specifications. In cabinet shop drawings you need to provide elevations and sections with dimensions. It should also address the materials such as wood species and the finishes.

What are cabinet shop drawings?

Cabinet shop drawings are very comprehensive millwork shop drawings that guide or illustrate how to manufacture and install cabinetry. These drawings are the planning of the actual product to be constructed. Cabinet shop drawings provide a set of specifications for all dimensions, materials, joinery, hardware, and finishes needed for the cabinetry.

Are copper countertop drawings the same as stainless steel?

Copper countertop drawings will have the same information as stainless steel countertop drawings other than the material type specified. Click on a link below to preview submittal drawings prepared for our customers for review and final approval. Hi Ken, Just emailed Kevin signed approved drawings! Very excited about seeing the final product!

How do I create a cabinet shop drawing?

In order to create these drawings you can use software such as Microvellum which assist you with specific tools for woodworking. Cabinet shop drawings operate as instruction manuals for building cabinets, so everyone has the same instructions, from designer to manufacturer to installer.
