

What is a battery switch on/off 275a?

1. Introduction The Battery Switch ON/OFF 275A is suitable for battery systems up to 48V. It has an unique ergonomic and aesthetic knob design. The knob is removable for isolation or safety purposes. The Battery Switch can be either surface or panel mounted, providing flexibility during install.

How do I remove a battery switch?

Ensure that engines and equipment connected to the same DC circuit as the Battery Switch are turned off. Turn the Battery Switch knob counter clockwise to the "OFF" position has been reached. Pull the knob away from the Battery Switch. Removal of the Battery Switch knob.

How do I mount a battery switch?

Mount the Battery Switch onto the desired surface (surface mount) or panel (rear panel mount). Remove the appropriate side-plate for cable access. Do not remove the side-plate facing upward as water may get in from the top. Use 120mm² (4/0 AWG) cables on all terminals to meet the Battery Switch current rating.

How do you connect a battery switch?

Use 120mm² (4/0 AWG) cables on all terminals to meet the Battery Switch current rating. Connect one terminal to the positive battery cable. Connect the other terminal to the positive cable of an alternator, load circuit or second battery (depending on installation type).
