

What is a selectrify ® battery housing?

The selectrify ® battery housing is a newly developed steel design offering excellent performance. It consists of an enclosure with a frame,connection profile,upper and lower support arms,underride guard and cover. It is available in a wide range of patented designs and is almost weight-neutral compared with aluminum.

What is a battery housing?

The battery housing is the central safety componentthat must meet the highest standards in terms of sealing,electrical conductivity,mechanical strength,and much more. It essentially consists of a battery lid /cap and a battery can - including the critical interface between these two components.

Which material is best for battery housings?

Life cycle assessments show that steelis the most sustainable material for battery housings. Up to two thirds less greenhouse gas emissions arise in the production of a steel battery housing compared with an aluminum design. During use,the carbon footprints of steel and aluminum battery housings are virtually identical.

What is a battery enclosure?

A battery enclosure is a housing,cabinet,or box. It is specifically designed to store or isolate the battery and all its accessories from the external environment. The enclosures come in different designs and configurations. Enclosure for Battery Battery box plays an integral role in both domestic and industrial applications.
