

Who are customisation & Assembly kiosk manufacturing services in the UK?

Our customisation and assembly kiosk manufacturing services in the UK allow us to meet our clients; unique needs and we ensure that every product we produce is of the highest quality. Over the years we have designed and manufactured many bespoke display units, as well as retail fixtures and fittings for use in a wide range of stores including:

What sizes are available for MSK kiosks?

Choose from nine standard sizes including single, double, or triple door openings to best fit your application. MSK kiosks have a press-formed and welded mild steel construction and are supported by the appropriate certification to IP55 of BS5490 to give excellent weather protection and good earth continuity.

What materials are used to build a kiosk?

Typically, these panels feature a FSC Certified UKTR legally verified hardwood plywood core, encapsulated in fire-retardant resin and chopped strand mat fiberglass. Moreover, for larger kiosks, we add extra reinforcements, such as steel, to ensure they meet structural requirements.

What types of kiosks are available for alarm control panels?

Mild Steel and GRPSPEL offer a selection of mild steel and GRP kiosks to house the range of alarm control panels, these come in both single and double door formats, see below table. The range of kiosks comply with current standards, are weatherproof and available with optional anti-frost heaters where required.
