What is a stainless steel work station?

This stainless steel work station combines durability, chemical-resistance, cleanliness, and conductivity. The 304 stainless steel top is factory mounted onto an epoxy-finished or powder-coated steel frame made of all-welded square tubing.

How do I choose the best stainless steel work station?

All base designs include leveling feet to provide stability on uneven floors. For optimal cleanliness, select the UltraClean(TM) stainless steel work station, which features an electropolished finish that removes the top layer of stainless steel and leaves behind an ultra-smooth layer of chromium and nickel.

What are corrosion-resistant stainless steel enclosures?

Corrosion-resistant Stainless Steel enclosures that can be easily configured to provide localised control for electrical equipment such as pumps, motors and lighting installations. Based on Abtech's SX enclosure range, the SXCS combines a wide range of sizes with pre-defined operator layouts.
