

Who is the casing company?

The Casing Company was established in 2021 to provide pipe ramming for horizontal, vertical and angled installation of steel pipes and casing services for directional drilling operations throughout Western Canada.

Can stainless steel be buried underground?

GUIDELINES FOR USE OF STAINLESS STEEL UNDERGROUND Stainless steel can provide excellent service underground. It is stronger than polymers and copper, and its resistance to chlorides and acidic soils is significantly better than carbon or galvanised steels. The performance of stainless steel buried in soil

Are stainless steel pipes suitable for underground applications?

According to national standards, such as GB/T 19228, stainless steel pipes must meet specific requirements for corrosion resistance to ensure their stability and reliability in underground applications. In summary, stainless steel pipes have excellent characteristics and advantages for underground applications.

Can a copper pipeline be electrically isolated from a metal casing?

(c) Except for unprotected copper inserted in a ferrous pipe, each pipeline must be electrically isolated from metallic casings that are a part of the underground system. However, if isolation is not achieved because it is impractical, other measures must be taken to minimize corrosion of the pipeline inside the casing.
