

Underground panel IP55 IP65 ducting metal roof

What is the difference between IP55 and IP65 enclosures?

Just like IP55, it can also handle water jets from any direction. But IP65 enclosures are usually built stronger, so they last longer in rougher conditions. In short, IP65 gives better protection, especially if you're dealing with lots of dust or moisture.

What is an IP55 enclosure?

What this means in real life: IP55 enclosures are great for indoor and light outdoor environments where occasional dust and water exposure are expected, but nothing extreme. Think workshops, HVAC systems, or sheltered outdoor panels. ? Dust can enter in small amounts, but won't affect performance.

What is an IP65 enclosure?

IP65 enclosures offer stronger protection and are built for tougher environments. They're completely sealed from dust and can withstand high-pressure water jets, making them a reliable option for both outdoor and industrial settings. Common use cases:

Are IP55 enclosures good for outdoor use?

IP55 enclosures are great for indoor and light outdoor environments where occasional dust and water exposure are expected, but nothing extreme. Think workshops, HVAC systems, or sheltered outdoor panels. ? Dust can enter in small amounts, but won't affect performance. ? Water from a standard hose won't cause damage.

Its sleek and unobtrusive appearance allows for easy integration into various indoor /outdoor settings, such as utility rooms, offices, garden, or equipment closets.
