

What are elutron underground storage tanks?

Elutron underground storage tanks are engineered for simple installation. Their inherent stiffness eliminates the need for deflection monitoring during backfilling, unlike fiberglass tanks. These features save installers hours typically spent prepping non-metallic tanks. At TrueNorth Steel, we have the capacity to keep your projects moving.

What is a Plasteel elutron underground fuel storage tank?

Plasteel Elutron underground fuel storage tanks incorporate the time-proven strength and reliability of steel tanks with a unique impervious fiberglass reinforced (FRP) outer secondary containment layer. This seamless outer FRP layer creates a barrier that protects the steel tank from the potentially corrosive effect of underground environments.

Are elutron underground storage tanks UL 58 or UL1746?

Tank built and tested in accordance with UL58 Steel Underground Tanks for Flammable and Combustible Liquids, and UL1746 External Corrosion Protection Systems for Steel Underground Storage Tanks. Elutron underground storage tanks are engineered for simple installation.
